# Noz Urbina

## Content strategist and modeller

+20 years experience in structured content solutions with focus on adaptive and omnichannel strategies

## Author

“Content Strategy: Connecting the dots between business, brand, and benefits”  
([thecontentstrategybook.com](http://thecontentstrategybook.com))

## Lecturer

Content Strategy programme at the University of Applied Sciences, Graz, Austria

## Founder

Urbina Consulting and OmnichannelX Conference

Sur le Pont d'Avignon  
On y danse, On y danse

# Widely applicable principles

Life sciences, Financial Service, High Tech, Telecoms, Manufacturing, and more

# WHAT'S WRONG?

# Analytics data are not business metrics

In a so-called  
“**attention economy**”,  
we have fallen into the  
trap of measuring what  
**vendors and software**  
**serve up most easily:**  
interaction data

Business metrics  
**measure the flow of**  
**value (revenue)**  
in, out, and around the  
brand

# What is a business metric?

Strategy

---

KPIs

(Key performance indicators)

---

Metrics

---

Data points

# What is a business metric?

A data point **measures a specific value** or total in a process

- Clicks
- Downloads
- Impressions
- Likes
- Scroll depth
- Forwards / Shares
- ...

Strategy

---

KPIs

(Key performance indicators)

---

Metrics

---

Data points

---

# What is a business metric?

A metric is a data point – that may unify multiple simpler data points – that **assess the success of a business process**

For content...

- Usability / Actionability
- Clarity
- Accessibility
- Engagement
- Retainability
- Relevance to user task
- ...

Strategy

---

KPIs

(Key performance indicators)

---

Metrics

---

Data points

# What is a business metric?

A KPI (Key performance indicator) is a **primary business metric** that directly measures progress against **strategic objectives**.

Every KPI is a metric, but not every metric is a KPI.

- Time-to-market
- Customer-acquisition-cost
- Cost-per-lead
- Customer acquisition / time
- Customer churn
- Customer effort score
- # of Sales qualified leads
- Customer satisfaction
- Cust. Job completion rates
- ...

Strategy

---

KPIs

(Key performance indicators)

---

Business metrics

---

Data points

# What is a business metric?

You may have a KPI which is not directly measurable, but must be measured by proxy, because you can't get the direct data.

Strategy

---

KPIs

(Key performance indicators)

---

Business metrics

---

Data points

# What is a business metric?

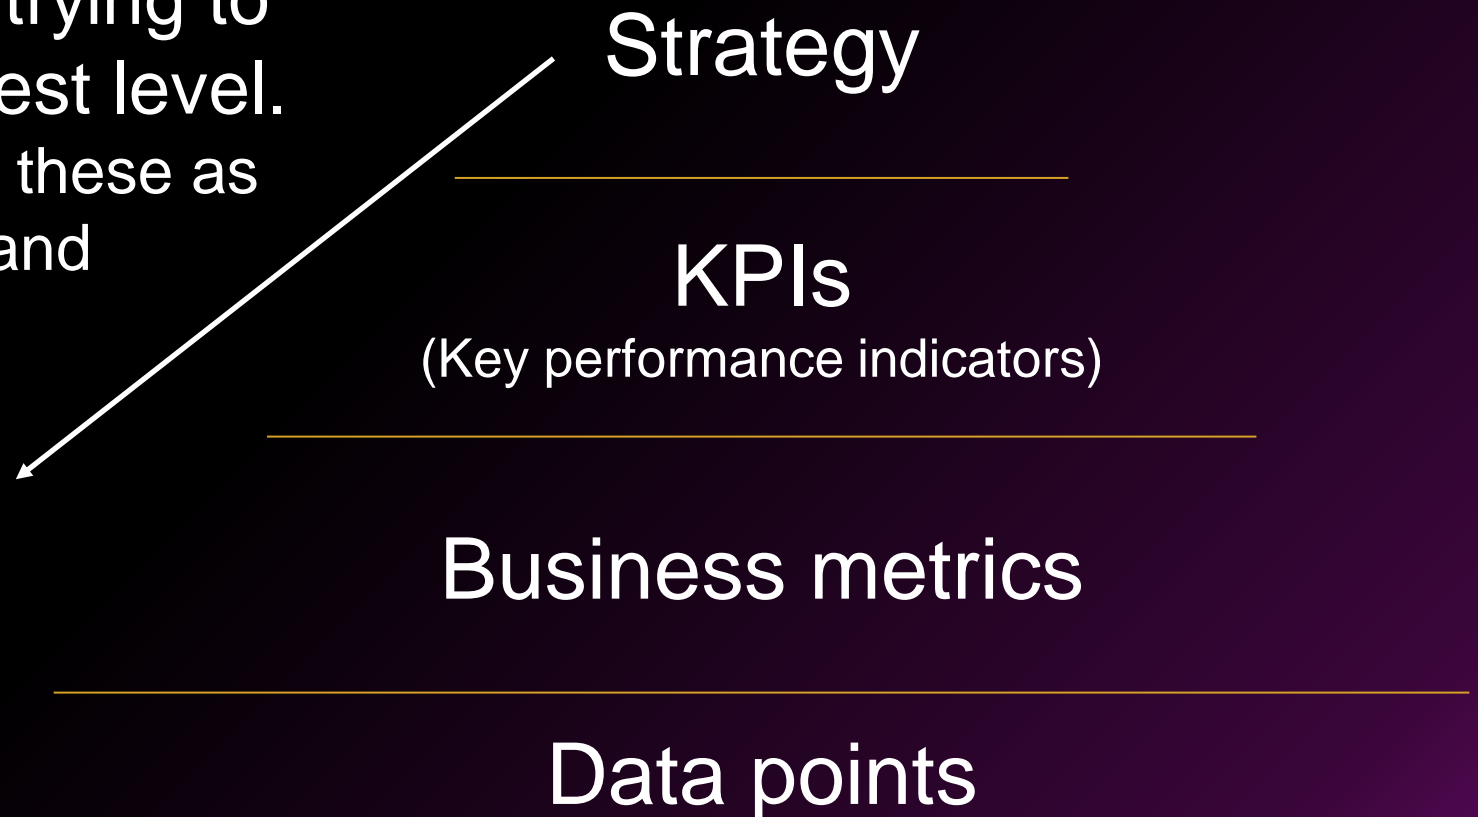

**Strategic goals or objectives** are what the organisation is trying to accomplish at the broadest level. There can be layering within these as well, like vision, mission, brand values, etc.

## Highest level

- Move into Asian market
- Overtake main competitor

## Initiative level

- Increase X user group's efficiency
- Make X% of users go premium

# The “big 3” metrics the exec care about

Top-level KPIs

How much are we growing?

How happy are our customers?

How cost-effective are we at serving & selling?

**WHAT SHOULD WE  
BE DOING BETTER?**

The focus has been on what was  
**easiest to measure**

**We need to focus on what adds real value**

To our **users**

To our **employers**

To the **world**

“Measuring satisfaction on  
**customer journeys is 30%**  
more predictive of overall customer satisfaction  
than measuring each  
**individual interaction**

“It may not seem sexy, but  
consistency is the secret  
ingredient to  
making customers happy.”

strategy and customer experience. He's well known as a pioneer in customer journey mapping and adaptive content modelling for delivering personalised, contextually relevant content experiences in environment. Noz is co-founder and Programme ChannelX and its online and offline events. He is also book "Content Strategy: Connecting the dots brand, and benefits" and lecturer in the Masters content strategy at the University of Applied Sciences, Graz.

In other words

**Understand** audience expectations.

**Design everything** to meet them.

**Measure** whether you did so.

# GETTING READY TO MEASURE

# Before defining metrics, these will help...

## **Journey maps**

A shared, consistent definition of **what you're measuring** (who, what, when, where, why?).

## **Taxonomy**

**A shared framework** that makes numbers make sense.

# PERSONAS & JOURNEYS

Understanding and measuring the 5Ws of content

AKA Walking a mile in  
the user's shoes

$$\text{Journey} = \frac{\text{Questions}}{\text{Time}}$$

$$\text{Journey} = \frac{\text{Questions x Emotions}}{\text{Time}}$$

$$\text{Journey} = \text{Context} + \frac{\text{Questions x Emotions}}{\text{Time}}$$

$$\text{Journey} = \text{Context} + \frac{\text{Questions x Emotions}}{\text{Time}}$$

- **Who** – Persona, Segment...
- **What** – Content Type, Channel, Product...
- **When** – Time, Season, Life Moment...
- **Where** – Region, Environment...
- **Why** – Job to be done, motivation...

$$\text{Journey} = \text{Context} + \frac{\text{Questions x Emotions}}{\text{Time}}$$

Taxonomy:  
trackable  
items

- **Who** – Persona, Segment...
- **What** – Content Type, Channel, Product...
- **When** – Time, Season, Life Moment...
- **Where** – Region, Environment...
- **Why** – Job to be done, motivation...

PERSONAS (1)

Lisa

**General**  
Anxious and easily overwhelmed, but dedicated to personal growth, frequently in conflict with parents

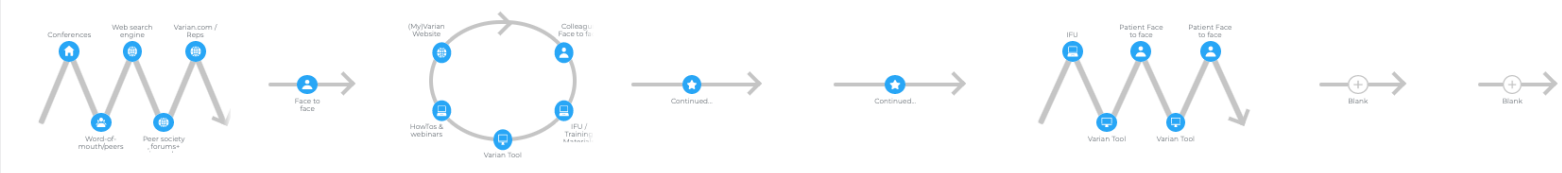

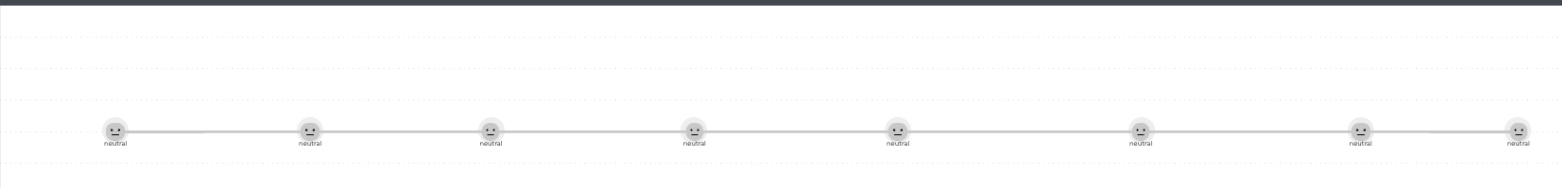

**Responsibilities & goals**  
Lisa checks the machines and then treats patients or does scans, in addition to patient scheduling and some nursing duties. These tasks were not a focus in her RIT training, so there has been a learning curve for her.

**Jobs to be done (see Job Canvas)**

1. Optimising treatment
2. Learning to optimise

**Information needs**  
Easy access to and notifications about training related to her role as she is always eager to learn more and grow. Lisa understands the theory behind machine operations that she learns at in-person workshops, but she often feels surprised by situations that she encounters in the real world. She also wants refreshers training material so she can always be ready to apply what she's learned.

[EDIT IN PERSONAS](#)

	PRE-TRAINING	TRAINING	FAMILIARISATION	FIRST USE	OPTIMISATION	RESULT	
<b>User goals</b>	<p><b>CONTEXT</b></p> <p>Both physicists and planners understand that knowledge of the equipment is essential for effective treatment. They are aware that in their jobs, equipment is often complex.</p> <p>Triggered by a particular situation, by statistics or by regular QA procedure they want to know if there are improvements to make.</p> <p><b>They may have had training, but they need to</b></p> <ul style="list-style-type: none"><li>continue familiarising themselves and</li><li>incrementally build a mental model of how the equipment works,</li><li>get an overview of the tools and concepts in the tech, and</li><li>understand how these fit with their job.</li></ul>	<ul style="list-style-type: none"><li>get hands on with on equipment</li><li>learn differences between current knowledge and new tool</li></ul>	<ul style="list-style-type: none"><li>try to recapture knowledge lost since the training</li><li>map new concepts to her way of working and current mental models</li></ul>	<ul style="list-style-type: none"><li>understand additional terms and new concepts</li><li>integrate the training knowledge into her SOP / way of working</li><li>create new mental models representing the tools</li></ul>	<ul style="list-style-type: none"><li>feel confident my treatment is<ul style="list-style-type: none"><li>effective</li><li>safe</li><li>state-of-the-art</li></ul></li><li>deliver excellent care</li><li>avoid risks</li></ul>		<ul style="list-style-type: none"><li>I feel confident my treatment is state-of-the-art.</li><li>I know my treatment protocols use the Varian systems to their full potential. No surprises. I know all the relevant stuff of my Varian equipment.</li><li>I know where to go if I have additional questions.</li></ul>
<b>Narrative</b>	+ ADD TILE						
<b>Questions</b>	+ ADD TILE	<ul style="list-style-type: none"><li>How accurate is our treatment (protocol)?</li><li>How can I evaluate our treatments?</li><li>What can I learn from my fellow professionals? (with and w/o Varian)</li><li>What was it that we covered in training again? So hard to remember.</li><li>What's the big picture of what's most important to <b>me</b> for my work?</li><li>Why am I being told to start with all these new words to just read, memorise? I want to understand the <b>processes</b> and how they fit into what I need to do.</li></ul>	<ul style="list-style-type: none"><li>What are these terms? I keep having to click over to these "What is..." in PDFs and then it's really annoying to lose my page and get back where I came from.</li><li>I keep having to search for these external documents? Why can't they just give me a link to click?</li></ul>	<ul style="list-style-type: none"><li>"I don't know the difference between what they call a <b>manual or reference materials or educational materials</b>. Why should I have to know what form it's in? I just want the information!"</li><li>Why can't I see <b>all</b> the document structure's anywhere?</li><li>What is the latest &amp; greatest from Varian to inspire me?</li></ul>	<ul style="list-style-type: none"><li>How does it feel to use this new equipment?</li><li>How can I understand and remember the logic of <b>buttons, menus and labels</b>?</li><li>Is this new equipment delivering what it <b>promises</b>?</li><li>What <b>benefits</b> am I experiencing in my day-to-day work?</li><li>What are the <b>results</b> working with this new equipment?</li><li>Is <b>my patient</b> experiencing new benefit?</li></ul>		
<b>Process and channels</b>							
<b>Process description</b>	+ ADD TILE	<p>The trainer</p> <ul style="list-style-type: none"><li>prepares (customised?) training material</li><li>leads a hands-on onsite course</li></ul>	<p>The user</p> <ul style="list-style-type: none"><li>reviews the relevant tasks and concepts in the IFU</li><li>refers back to training material when needed</li><li>makes support calls to the help line</li><li>does practice runs on the equipment tool</li><li>visits the Varian website for the latest or additional information</li></ul> <p>The trainer</p> <ul style="list-style-type: none"><li>answers follow-up questions from trainees?</li></ul> <p>The support line operator</p> <ul style="list-style-type: none"><li>answers follow-up questions from trainees?</li><li>...</li></ul>		<p>The user</p> <ul style="list-style-type: none"><li>works with the equipment for the first time</li><li>is building confidence</li><li>is creating a mental model of buttons, navigation</li><li>experiences the first result of Varian equipment</li></ul> <p>The trainer (?)</p> <ul style="list-style-type: none"><li>contacts trainees in their first week for feedback on equipment, training, documentation.</li></ul>		
<b>Problems</b>	+ ADD TILE			<p>The topic structures are 5-6 levels deep. The TOC is 3 levels deep. The only other way to navigate the document is opening the bookmarks panel.</p>	<p>The topic structures are 5-6 levels deep. The TOC is 3 levels deep. The only other way to navigate the document is opening the bookmarks panel.</p>		
<b>Sentiment</b>							
<b>Ideas / Opportunities to add value</b>		<p><b>NOTE:</b> Could look at linking out to more detailed journey analyses about specific processes. For example, training, or first use, familiarisation, optimisation</p>	<p>1. <b>Change label "Quick Answers" for the roles to be more semantically accurate. It is actually key terms or key concepts</b></p> <ul style="list-style-type: none"><li>Quick answers should be quick answers to the questions users actually ask (and if they ask these, then what do they mean by them?)</li><li>The product function and features names are foreign and therefore force you to read through them to understand what they are and whether they are relevant.</li></ul>	<p>1. <b>Enable going "back" when using in hyperlinks in PDF</b></p> <ul style="list-style-type: none"><li>The command on Windows are:<ul style="list-style-type: none"><li>Alt + left arrow</li></ul></li><li>The command on Mac are:<ul style="list-style-type: none"><li>Command-left arrow in Adobe Reader</li><li>Command-[ (open square bracket) in Preview (built-in viewer)</li></ul></li><li>This could be a note near hyperlinks in a margin. We think the shortest way to say this is: <b>"To go back to the source"</b></li></ul>	<p>1. <b>Maintain a library of DITA keyrefs to allow linking to external PDFs</b></p> <p>2. <b>Automate cross-references and linking (Fonto/PP Duma)</b></p> <ul style="list-style-type: none"><li>In a digital-first environment it would be possible to link to knowledge articles, or any new material online relevant to the current material in IFUs/CPL material and beyond</li></ul>	<p>1. <b>Create personal cue cards</b> (physical and digital) for first-time users. Distribute these in the training session.</p> <p>2. <b>Contact users in the week of their first use</b> (email, app-notification): Actively collect feedback on equipment, documentation and training.</p>	<p>1. <b>The equipment recognizes a user not optimally using controls and suggests a checklist</b> from the documentation that enables the user to learn for this specific situation.</p>

Carlos Abler

**3 Ways to preoperatively help reduce the risk of Surgical Site Infections**

- Cleanse the patient's skin with preoperative chlorhexidine wipes/showers/baths
- When necessary, remove hair pre-operatively with a single-use blade immediately before surgery
- Apply nasal antiseptic 1 hour prior to surgery to reduce bacteria in the nares

Watch the Surgical Preparation Nose to Toes Webinar

**MRSA in the Nares?**

Nasal antiseptic helps reduce MRSA that may cause SSI. <sup>2,3</sup>

Download Study Summaries

**3M™ Skin and Nasal Antiseptic**

3M Surgical Solutions

- S. aureus is the leading cause of surgical site infections.
- Approximately 50% of the population are colonized with S. aureus in the nares.
- 80% of S. aureus infections are caused by the patient's own (nares) nasal flora.
- Nasal carriage of S. aureus is a significant risk factor for developing SSI.\*
- 3M™ Skin and Nasal Antiseptic reduces nasal carriage of S. aureus by 96.2% and maintains this reduction for least 24 hours.<sup>2</sup>
- 3M™ Skin and Nasal Antiseptic helps reduce the risk of SSI when used as a comprehensive preoperative process.<sup>2,3</sup>

**Safety & Efficacy Information 3M™ Skin and Nasal Antiseptic**

3M Surgical Solutions

3M™ Skin and Nasal Antiseptic is the only product designed for pre-surgical reduction of Staphylococcus aureus in the Nares.

**Indication:** Reduce Staphylococcus aureus carriage in the nares.

**Contraindications:** Do not use on patients with known hypersensitivity to any of the ingredients.

**Warnings:** Avoid application to eyes, ears, nose, mouth, and mucous membranes. Do not use on patients with known hypersensitivity to any of the ingredients.

**Directions:** Apply to the nares as directed. Do not use on patients with known hypersensitivity to any of the ingredients.

**3M™ Skin and Nasal Antiseptic Q&A**

3M™ Skin and Nasal Antiseptic is the only product designed for pre-surgical reduction of Staphylococcus aureus in the Nares.

**Q: How do I know my product is the right one for my patient?**

A: 3M™ Skin and Nasal Antiseptic is the only product designed for pre-surgical reduction of Staphylococcus aureus in the Nares.

**Q: How do I know it works from the nose to the rest of the patient's body?**

A: 3M™ Skin and Nasal Antiseptic is the only product designed for pre-surgical reduction of Staphylococcus aureus in the Nares.

**Facts about Iodine and Iodophors**

3M™ Skin and Nasal Antiseptic

Iodine is a natural element that is found in the soil and in seaweed. It is an essential nutrient for the human body. Iodine is used in the production of thyroid hormones, which are important for the body's metabolism.

Iodophors are compounds that contain iodine. They are used as disinfectants and antiseptics. Iodophors are more effective than iodine alone and are less irritating to the skin.

**3M™ Skin and Nasal Antiseptic (Povidone-Iodine Solution 5% w/w [0.5% available iodine] USP) Patient Preoperative Skin Preparation 192401, 4 mL.**

3M Health Care

Help Reduce Surgical Site Infections

3M™ Skin and Nasal Antiseptic (Povidone-Iodine Solution 5% w/w [0.5% available iodine] USP) Patient Preoperative Skin Preparation 192401, 4 mL.

Benefits:

- 96.2% reduction in nasal carriage of S. aureus.
- 96.2% reduction in nasal carriage of S. aureus.
- 96.2% reduction in nasal carriage of S. aureus.
