

Getting started with content ops

Rachel McConnell

What is content ops?

**Operations is a core part of content leadership
and key to delivering product content strategy.**

It's making sure you have the right people, process, tools and systems in place to work effectively and efficiently, and helps your team scale with impact.

People

- Recruitment
- Onboarding
- Building collaboration
- Measuring engagement or team satisfaction

Capability

- Assessing skills
- Capacity planning
- Identifying skill gaps
- Organising or running training and coaching
- Facilitating crits or workshops

Process

- Improving process, workflows and ways of working
- Creating frameworks and guidance
- Defining standards and governance
- Creating templates for testing and demonstrating success

Tools and systems

- Assessing tools and systems for suitability
- Procuring new tools
- Creating simple team tools and templates
- Defining or building design system elements

Alignment

- Managing budgets
- Encouraging cross-functional work
- Identifying efficiency savings
- Advocacy of content
- Demonstrating impact of content to wider organisation

Operational activities are all the activities we do around actually doing the work that enable us to get the work done.

Rachel McConnell
@Minette_78

How much does your company focus on the operational side of content strategy and design (how content designers get their work done, the tools they use, capability and how they work with others)?

@Minette_78

Operations isn't:

- **Defining guidance, such as voice and tone**
- **Defining strategic direction**
- **Managing content**
- **Managing people**

**How do content ops
and strategy work
together?**

Planning

Implementing

Focus

Strategist: Understand what brand/business, and users need to achieve

Ops: facilitate workshops, help find efficiencies with other departments

Lay foundations

Strategist: Establish brand voice, formats, frameworks, style guides etc

Ops: Enable guidelines frameworks/design system

Define who does the work

Strategist: Identify who will do the work

Ops: Recruitment, onboarding, identify skill gaps, organise training and coaching

Define process

Strategist: Identify how the work will be done

Ops: Select tools, simplify processes, procure tools and systems

Measure

Strategist: Define how success will be measured

Ops: Create test frameworks, document test outcomes or best practice examples

Maintain

Strategist: Define how the work will be updated and tested

Ops: Help create audits, measure engagement, identify improvement areas

We don't always need an ops team or operations person to focus on *how* we deliver the work.

Any of us can start to think more operationally and spend time removing the barriers

Identify your pain points

@Minette_78

- **What should content designers be doing?**
- **What are they doing?**
- **What's the desired outcome vs actual?**
- **What are the biggest pain points?**
- **What's being done about it already?**
- **What category do the issues fall into: people, process, tools and systems, capability or organisational alignment?**
- **What's being said?**

- **Team interviews**
- **Pain points workshops**
- **Stakeholder interviews**
- **Surveys**
- **Time-tracking surveys**
- **Process mapping**
- **Tools assessments**
- **Pre-mortems**

**Summarise the
issues in a way you
can share**

Joining a squad

Understand product strategy

Starting design

Producing work

QA

Production to live

Measuring

Sharing success

Developing new skills

Actions
What should the content designer be doing?

- Understanding OKRs, roadmap and initiatives
- Getting set up on Figma
- Intros and ways of working with PDs, PM and research

Desired outcome
What is the required outcome?

Content designer fully up to speed, feels like part of the team and ready to start work

Current outcome
What is the present outcome?

Content designers can't get into Figma, isn't sure about priorities and ways of working aren't established

Gains
What's already being done or improving?

PMs are starting to understand content design

Roadmaps are becoming more established

Quotes
What are CDs/PDs/PMs saying?

"I was a bit confused when I joined my squad as to what our priorities were and why"

Tools/systems

Processes

Ways of working

Capability

Opportunities
What can we do to improve?

Pains
What causes problems or frustration?

**Identify potential
opportunities
through ideation**

It takes ages for CDs to get
Figma access

CDs and PDs aren't sure
how they should work
together

Some PDs aren't used to
working with CDs

It takes ages for CDs to get Figma access

CDs and PDs aren't sure how they should work together

Some PDs aren't used to working with CDs

How might we ensure all CDs have immediate Figma access?

How might we communicate how CDs and PDs should work together?

How might we get more designers used to working with CDs?

How might we ensure all
CDs have immediate Figma
access?

Make sure all new starters
have correct fonts set up so
they can edit

Create 'front page' doc for
each project to onboard
new team members

Block out time on new
starters day to check they
can access

Allow access through single
sign-on

Add Figma to team
onboarding checklist

**Identify the highest
impact solutions**

High impact

Do it next

Make sure all new starters have correct fonts set up so they can edit

Do it now!

Add Figma to team onboarding checklist

Block out time on new starters day to check they can access

High Effort

Low Effort

Park it

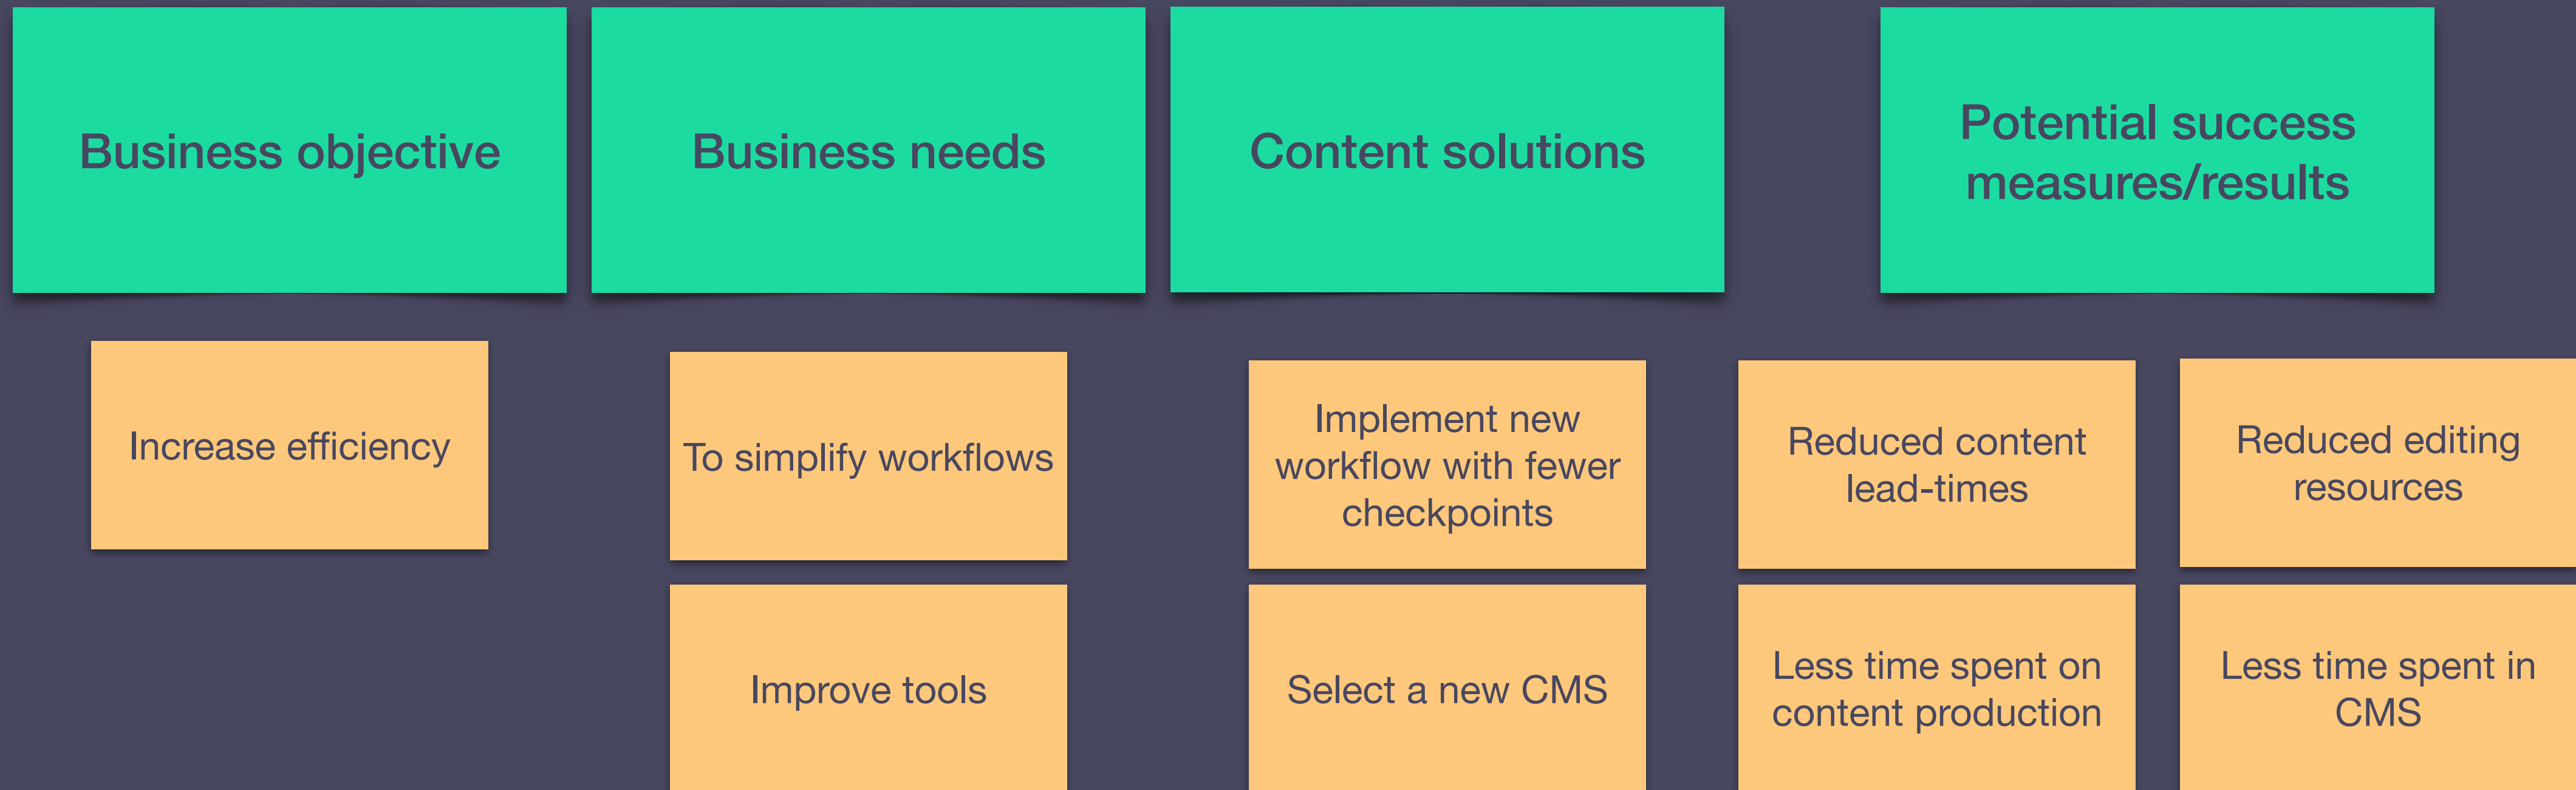

Allow access through single sign-on

Maybe later

Low impact

@Minette_78

**Link your work back
to company goals**

Define your team's activity roadmap

ASAP

Figma

- Add Figma to onboarding checklist
- Make sure all fonts avail to CDs
- Run tailored Figma training sessions
- Assign Figma buddies

6-12 months

Collaboration

- Agree process flows
- Run joint co-design workshops
- Run sessions with PMs to educate

Training

- Create bespoke CD training
- Roll out to test group
- Iterate and roll out to whole team

12 months+

Design system

**Make time to
get it done!**
